DHANASHRI NIMBHORKAR

Business Analyst | Functional QA | Application Support — ERP, Inventory and IoT

Bangalore, Karnataka, India | +91 93563 66922 | nimbhorkardhanashri302@gmail.com | LinkedIn: linkedin.com/in/dhanashri-nimbhorkar-75432b260

PROFESSIONAL SUMMARY

Business Analyst and technical support professional with 2+ years at IoTReady across the full lifecycle of ERP, inventory and warehouse-management (WMS) software: requirements gathering, functional specifications, functional and regression testing, defect tracking and production-issue investigation. Supported 1500+ customer sites across India within a 1-hour SLA, turning escalations into documented root causes and reproducible defects. Technical foundation in SQL, Python, JavaScript, REST APIs and Linux, with hands-on IoT device, firmware and integration troubleshooting.

CORE SKILLS

- **Business Analysis:** Requirements gathering and elicitation, functional specifications, user stories and acceptance criteria, workflow and process analysis, gap analysis, stakeholder coordination, UAT coordination
- **QA and Testing:** Functional testing, regression testing, user acceptance testing (UAT), test-case design and execution, defect reporting and fix verification, API testing (Postman)
- **Application and Technical Support:** L1/L2 troubleshooting, root-cause analysis (RCA), incident and escalation management, SLA-driven ticket handling, remote support, production-issue investigation, knowledge-base and troubleshooting-guide authoring
- **Domain:** ERP, inventory management, warehouse management (WMS), stock movement, order and fulfilment workflows, IoT solutions, device configuration, firmware upgrades, hardware-software integration
- **Technical:** SQL, Python, JavaScript, HTML, CSS, REST APIs, Linux
- **Tools:** Jira, GitHub Issues, Git, Postman, MS Excel, Google Sheets

PROFESSIONAL EXPERIENCE

Junior Business Analyst — IoTReady, Bangalore | Jan 2026 – Oct 2026

- Gathered and documented business and functional requirements for inventory and warehouse-management workflows across customer deployments, producing functional specifications adopted by the development team.
- Translated business needs into user stories and acceptance criteria and clarified expected behaviour with developers, QA and business stakeholders, reducing requirement rework on subsequent releases.
- Analysed inventory, stock-movement and ERP processes to validate business rules and identified gaps before development, catching defects earlier in the release cycle.
- Prepared and executed functional, regression and user-acceptance tests for each release; wrote test cases covering core business scenarios and release validation.
- Logged and tracked defects in GitHub Issues with reproducible steps and expected results; verified fixes and regression outcomes before sign-off.
- Investigated production issues from both business and technical angles, delivering root-cause notes that reduced repeat incidents; maintained the team's functional and testing documentation.

Technical Support Associate — IoTReady, Bangalore | Jul 2024 – Dec 2025

- Provided L1/L2 technical support for IoT hardware, software and ERP solutions across 1500+ customer sites throughout India, resolving 30+ tickets per month within a 1-hour SLA.
- Troubleshot hardware, firmware, software and device-integration issues remotely; supported installation, configuration and multiple firmware-upgrade cycles.
- Owned customer incidents and escalations end to end, reducing average time to resolution.
- Performed root-cause analysis on recurring and production issues and coordinated corrective actions with engineering, closing the top recurring issue patterns.
- Supported inventory, warehouse and stock-movement workflows; validated technical solutions with engineering, QA and operations before customer rollout.
- Authored troubleshooting guides and technical documents that standardised issue resolution and reduced escalations to engineering.

EDUCATION

- **B.Sc. Computer Science** (final year, expected 2027) — Sant Gadge Baba Amravati University, Amravati
- **Advanced Diploma in Software Programming** (2022 – 2024) — Navgurukul
